This offer is very interesting for companies who want to start ads business with a highly recognize products brand.

Please find out more about the software at: <http://www.sqldeveloper.net>.

Introduction

SQLDeveloper and **DreamCoder** products are free database tools for the software development world community .

After seven years in the market the products was released on full free version with ads support. In May 2011, Since the beginning users have been very positive and today we have more than **290.000** visitors monthly to our ads campaign and each day is growing. The website is growing fast at around **10.000** new members daily.

The reason we are selling SQLDeveloper division is that we have other project that are increasingly demanding our attention.

Technical

The **DreamCoder** tools has always been updated regularly. For the website we use Joomla.

Included in the sale

Source code for all three products.

Domains: sqldeveloper.net, sqlplex.com . They will all be transferred to you after signing of the contract.

Trademarks : DreamCoder . They will all be transferred to you after signing of the contract.

Exit strategy

We are happy to work on a suitable exit strategy to make the transfer go as smooth as possible.

Price

The final price can be negotiated between the buyer and **Mentat Technologies**.
