

query builder and KEEP (DENSE_RANK LAST ORDER BY

Posted by jenna.booth@tpl.org - 2010/08/24 16:33

When using the query builder in version 4.2.6.0 and 5.1

If I use KEEP (DENSE_RANK LAST ORDER BY

example:

```
Max(ct.ACTCODE) KEEP (DENSE_RANK LAST ORDER BY ct.CDATE, ct.ACTCODE) Max Action
```

the query builder throws an error, specifically says

Invalid SELECT statement.

Unexpected token "(" at line

this doesn't happen if I run the query in the SQL Editor.

Is there a fix for this?
