

Editor Options Problem

Posted by mouhanad_alamli - 2010/04/23 15:35

Hi,

I am having a problem saving editor options with the free version of DreamCoder for Oracle (Build 4.4.1.5).

Easy steps to reproduce the problem:

1. Open "Editor Options".
2. Change Tab Stops to something like 7.
3. Open a SQL file.
4. Press "Tab".

This will move the caret 4 characters instead of 7. From what I am seeing none of the options are being saved.

Thank you,

-Mouhanad S. Al-Ramli

Hi Mouhanad,

We can reproduce the same problem with some editor options, our development team is now check this problem...

Regards,
Peter
