

DreamCoder for MySQL beta tester program

Posted by admin - 2008/05/14 15:13

Mentat Technologies announces the launching of Beta Tester Program, which is an opportunity for the community of MySQL developers to participate in the development, planning and guarantee the quality of the DreamCoder for MySQL. If you register as a beta tester, you will have complete and free access to our development group, technical support, latest versions of our product, and unlimited access to DreamCoder.

Your participation as a beta tester programmer will give you the following benefits:

1. A one year personal license of the DreamCoder for MySQL most complete version without any restriction.
2. Preferential access to new versions.
3. The possibility of influencing the product, and to suggest changes before the launching of the DreamCoder for MySQL final version.
4. Direct contact with the DreamCoder development and support team through Email and forum discussions.
5. Direct contact with the Beta Tester team through Email and forum discussions mail and discussion forums.

To participate as a Beta Tester you must fulfill the following requirements:

1. Use the product at least 5 hours per week.
2. Report all errors encountered by the bug tracker.
3. Verify corrections made on previous reported case and solve them with the installed version.
4. Provide suggestions about new functions and improvements of the interface.

If you do not comply with the requirements previously mentioned, you will lose the right to utilize beta tester.

If you wish to take part in our beta tester program, and can fulfill the requirements :

<http://www.sqldeveloper.net/customer-service/support-center/beta-tester-program.html>
