

## How can i import data from a mysql dump file

Posted by mail-question - 2008/06/08 11:36

---

Hello,how can i import data from a mysql dump file (eg. dump.sql) using dreamcoder to my database?  
Any suggestions will be appreciated.

Thank you.

Thank you.

There one way to import your mysql dump file:

Please open the dump file and you can click "run script (F7)" button to execute the sql statements in your current mysql database.
