

## Import/Export functions

Posted by Marcus2 - 2010/02/19 15:11

---

Hi, I'm Italian and I start to use DreamCode for MySQL Free version 5.1 under MS Windows Vista Home Basic.

I read the on-line help finding pages speak about the import/export function. The on-line help show the Import/Export icons on the toolbar but I cannot see that icons in the toolbar when I open a table management window.

So, the question is: are the import/export functions available only in the Enterprise edition?

Thank-you in advance for reply. <http://www.sqldeveloper.net/images/fbfiles/images/HelpScreenShot.jpg>

---

Ok, I find the answer in an old (the first?) thread. So I find the link to the dashboard comparing Free and Commercial Version.

Thank-you anyway.

hi,

The Free version already include some import and export option through the object navigator.

Hi Peter,

thank-you so much for the hint!  
Sometimes I'm very blind:S !
