

Rules and guidelines -READ FIRST

Posted by admin - 2008/05/14 15:22

Dear users,

We are very keen to make DreamCoder for PostgreSQL better. We invite you to tell us what you think. Let us know if you have any questions, comments or suggestions.

Please read the rules:

These rules and guidelines keep the quality of the discussion high. Users are required to follow these rules. Messages posted in violation of these rules may be removed.

Descriptive title

Give your post a descriptive title, so that people have some idea what it will be about.

Detailed description

Complete description of situation and if possible include a small code sample that demonstrates the problem.

Error message

If you're getting an error message, include the error message and number and indicate the error causes.

Screenshot

If necessary include the screenshot.

Script and code

Include scripts and data if is necessary.

Environment description

Specify the complete information about your environment: database version, os version, remote or local connection.

Product version

Specify the DreamCoder for PostgreSQL version.

Finally, please read the Acceptable Use Policy, which has specific rules of conduct for use of these forums, including issues such as copyrighted material, advertising "spam", and abusive behavior. These rules are strictly enforced. We appreciate your cooperation.
